

COVID-19 Vaccines

Welcome COVID-19 Webinar 3 in the series. This webinar will help go over and illustrate the rigorous process a vaccine must go through before being provided to the public. With any new vaccine, some people may have their doubts and hesitate in receiving it. However, we know that if people avoid the vaccine and fear it, COVID-19 will still be spreading. By providing this background information, we hope to relieve the fear of the vaccine and will encourage individuals to get it once the final COVID-19 vaccine is approved. The to-do list is to help guide you on all the sections you will complete in this module.
